

APRIL 15-17[™], 2025 TANGIER, MOROCCO

CONFERENCE SCOPE

COFMER'05 aims to bring together international scientists, experts, and industry professionals within the renewable energy sector. The conference aims to create a collaborative space for scientific and technological research, training, and technology transfer.

CONFERENCE FORMAT

The program at COFMER'05 will include plenary sessions, oral communications, and poster presentations, all conducted in English.

Participants will have the opportunity to explore the latest research and advancements in **renewable energies**, including their storage and integration into electricity transmission and distribution networks.

ENGAGE WITH LEADING SCHOLARS & PROFESSIONALS

1 MATERIALS AND MECHANICS FOR ENERGY

Plasma, Sol Gel, Aerogels, Nanostructures, Emerging Materials, Thermal Transfer, Mechanical Integration

2 RENEWABLE ENERGY SOURCES

Green Hydrogen, Wind, Hydro Turbines, Solar, Bioenergy, Geothermal, Tidal

3 ENERGY CONVERSION TECHNOLOGIES

Photovoltaics, Wind Turbines, Bioenergy, Fuel Cells, Thermodynamics, Heating & Cooling

SMART ENERGY SYSTEMS

Forecasting, Storage, Gestion, Optimization, Grid Integration

RF ENERGY HARVESTING

Technologies, Applications, Efficiency, Devices

Nantes

Université
